

## Cycling Schemes

### **New Cycle Routes**

Dedicated or shared-use cycle lanes to encourage this important mode of sustainable travel; the photographs show a segregated route near Fibbersley Primary School and a shared-use facility near the Rushall Primary School / EDC site

### **Cycle / Scooter Storage**

Dedicated shelters for the storage of cycles and scooters. Shown above are recently introduced facilities at St Francis Primary and the Borough's first dedicated scooter storage at Short Heath. Evidence such as annual travel data, weekly cycle/scooter count and other supporting documentation is required before schemes can be considered.

### **Crossing facilities (dropped kerbs, toucan) –**

The location and number of cyclists helps determine the most appropriate crossing facility; above is a Toucan crossing located on Broadway West near Joseph Leckie Academy
